

Instructions

These instructions will familiarize you with our [STANDARD BOOSTER™ BREWING PROCEDURES](#) of the Mr.Beer® Home Brewing System. Each recipe will produce about 2 gallons of our standard beer (approx. 3.7% abv) in as little as 14 days.

REFILL INCLUDES:

- 1 Can Hopped Malt Extract (HME)
- 1 Pouch Booster™
- 1 Packet Dry Brewing Yeast (under lid of HME)
- 1 Packet No-Rinse Cleanser

Step 1: Sanitizing

Follow the steps outlined in the [INSTRUCTIONS THAT CAME WITH YOUR KIT](#).

Step 2: Brewing

Mixing your first batch should take about 30 minutes, but it isn't beer until the yeast does its part. If you keep your fermenting beer between 68° and 76° F the yeast will stay happy, and should finish within about 7 days.

2.1. Fill keg with cold water to the 4-quart mark on the back. (Avoid using water that tastes bad, or has been treated by reverse osmosis or a water softener.)

TIP: FOR BEST RESULTS, USE BOTTLED SPRING WATER OR CHARCOAL-FILTERED TAP WATER BETWEEN 40° AND 60° F.

2.2. Remove yeast packet from under lid of HME, then place unopened can in hot tap water (warm liquid pours more easily).

2.3. Using the sanitized measuring cup, place 4 cups of water into a clean 3-quart pot, then SLOWLY sprinkle in Booster™ while continually stirring to avoid clumping.

2.4. Once the Booster™ is fully dissolved, bring to a boil, then remove from heat.

2.5. Stir HME into mixture of water and Booster™ (this mixture is called the wort).

2.6. Pour wort into keg. Bring the volume of the keg to the 8.5-quart mark by adding more cold water. Stir vigorously to mix well.

2.7. Sprinkle the yeast into your keg, WAIT 5 MINUTES, then stir vigorously and screw on lid (this is called pitching the yeast and begins the fermentation process).

2.8. Place keg out of direct sunlight, in a location with a consistent temperature between 68° and 76° F.

ALLOW TO SIT A MINIMUM OF 7 DAYS, 14 DAYS FOR BETTER FLAVOR.

CAUTION: DO NOT OPEN THE LID TIME DURING FERMENTATION; THIS CAN CAUSE BEER SPOILAGE.

Step 3: Bottling/Carbonating

Follow the steps outlined in the [INSTRUCTIONS THAT CAME WITH YOUR KIT](#).
