

13 BEERS *for the* HOLIDAYS

The holidays may feel far off at the moment, but when it comes to beer brewing, it's never too early to start. Many spicy, heavy, winter beers do best with a long conditioning time.

This list has a little bit of everything to accommodate the preferences of those with whom you choose to spend the winter holidays. Whether your group is all about hops, malt, fruit notes, spices, warming alcohol, or great mouthfeel - there's something here to brew. That's not to say we don't have even more great offerings on our [recipes page](#). These are just a couple beers with winning flavor, and a brew time you can manage if you plan to start enjoying your beer at the end of the year.
